

“It’s good to have a lifeguard, but you should also know how to swim”
-Sam Rosenberg

INPAX | Academy of Personal Protection

The world can be a dangerous place. And while personal security is a fundamental human need, it is ultimately a personal responsibility. In the moment of truth, the “lifeguards” of society simply won’t be there to protect us - whether from street crime or the potential of mass homicide. We are, in effect, on our own.

INPAX | Academy of Personal Protection – a nationally recognized leader in personal security, defensive firearms, and critical incident response training presents a practical, systematic approach to self-defense, designed so you can be your own lifeguard.

These programs will teach you how to recognize, avoid, and deter threats, and how to decisively respond physically to incapacitate an attacker if avoidance fails.

Teaching families and organizations to protect themselves for over a decade.

Simple.

Practical.

Real.

Smart.

Now, you, your family, and your workplace can benefit from the knowledge and tradecraft once reserved exclusively for elite bodyguards.

INPAX | Academy of Personal Protection

INPAX provides full-spectrum self-defense, defensive firearm, and critical incident response training for individuals, corporations and schools nationwide.

Individuals

Violence is never random. Even the most desperate predator is careful in selecting his victims. And "bad guys" always follow a predictable continuum of behavior in selecting and attacking their targets. The phases of this continuum can be identified—in advance—by easily spotted "indicators"—if you know what to look for.

INPAX will teach you how to recognize, avoid, and deter threats, and how to decisively respond physically to incapacitate an attacker if avoidance fails.

You will also learn how to think under pressure, negotiate the critical "interview" phase of an encounter, use verbal and non-verbal tactics to announce you will not be a victim, and use the appropriate level of force when "talking" turns into "touching".

INPAX programs are available for individuals of all ages and abilities.

- Defensive Tactics.
- Defensive Firearms - Beginner to expert. Handguns and Long guns.
- Think Like a Bad guy.
- Multi-state CCW permit.

Corporations

We live in a volatile world. Today, corporations, and the people within, have become recognized as high value targets for both domestic and international forms of violence.

The problem is that most people do not know how to recognize the early warning signs of violence, or how to respond, even if they do.

INPAX offers corporations the tools and training required to protect their people - from short seminars to comprehensive training programs - in how to detect and prevent workplace violence, terrorism, and executive kidnappings.

We believe that a safe workplace is everyone's responsibility and within everyone's capability.

- Advanced Executive Global Integrated Security (AEGIS).
- Critical Incident Response Training.
- Personal Security for the 21st Century.
- Travel Security and Executive Kidnapping.

Schools

INPAX training for educators offers a unique window into the minds of those who commit school homicide, and a clear-eyed view of the epidemic of school violence from the perspective of a security expert.

These vital in-service programs teaches teachers how to identify the warning signs - or "indicators" - of potential violence, and the immediate and appropriate responses to intercede and forestall those situations from spiraling out of control. Educators also learn - hands-on - how to decisively respond to an active shooter and how to manage their students in a crisis.

Your educators will emerge from this training smarter and more confident in their ability to predict, prevent, and respond to violence, acquiring the know-how to keep their students and themselves alive should they become the real first responder.

- Automatic Critical Incident Response Training (ACIRT™).
- Bullying and School Violence in the 21st Century.
- Eyes and Ears: Identifying the Potential Violent Student.

About our Training

INPAX has empowered thousands of individuals with the essential ability to manage violence in the real world. What makes it so different, so effective?

Simple. The distillation of 20+ years of research and real-life application, INPAX uses a small, highly focused vocabulary of verbal, non-verbal, and physical tactics that can be applied against a wide array of threats.

Practical. Using simple, gross motor processes that are effective regardless of size or strength, INPAX does not require years of continuous practice and athletic ability to achieve real skill.

Real. INPAX is a system proven effective under extreme adrenalin and real-world stress, and across the full spectrum of violence - from single opponents to guns, knives and multiple aggressors.

Smart. When the stakes are high and seconds count, the unique vertical decision making process that is the foundation of the INPAX system, allows you to know what to do, and how - instantly - no matter what the scenario.
